

Intervention Plan

Client: _____

Occupational Profile Summary

Pt is a 70-year-old female referred to occupational therapy for RUE hemiplegia resulting from L CVA in 2009. PMH is significant for blood clots in LLE and edema. No precautions d/t chronic nature of diagnosis.

Pt lives with her husband in a single-story home with two steps to enter from the outside. Pt and husband are both retired school teachers who enjoy volunteering at the local elementary school, traveling, and playing cards with friends from church. Pt was independent with all I/ADLs prior to CVA but now requires minimal to moderate assistance for daily tasks, including bathing, meal preparation, and home management.

Model of Practice/Frame of Reference

- PEO
- MOHO
- NDT
- PNF
- Motor Learning
- Biomechanical
- Rehabilitative
- Other
