

# Sitting Balance in Acute Care (Stroke)

## Watch

Watch all assigned videos:

- Sitting Balance in Acute Care, Part 1: Trunk Control
- Sitting Balance in Acute Care, Part 2: Sensory Impairment
- Sitting Balance in Acute Care, Part 3: Return to Supine

## Document

Complete a SOAP note for the entire treatment. Please review the rubric.

## Discussion Board Prompts

After watching the assigned videos, answer discussion board questions and respond to two other students by assigned due date. Please review the rubric.

1. Share your assessment of the caregiver's therapeutic use of self and professional behavior.
2. Make a list of 5 problems you observed that the client demonstrated.
3. Did he neglect one side or the other?
4. What did the therapist do to address the client's problems?
5. Do you feel he has good rehab potential? Explain why or why not.
6. Explain two interventions that were not demonstrated in these videos that you could use to address the client's problems. Provide at least one research article link to support EACH of your interventions.
7. Lastly, express how you feel about your ability to lead that same therapy session. What actions do you need to take to prepare yourself to lead this type of treatment session?
